* Introduction

It's time to go for some more traditional style GIS and take a short
break from python.

* Setup

#+BEGIN_SRC sh
mkdir -p ~/class/17
cd ~/class/17
wget http://vislab-ccom.unh.edu/~schwehr/Classes/2011/esci895-researchtools/src/gdal.org
#+END_SRC

* Getting NOAA charts

- What is an S57? What is a BSB?
- Why is proprietary bad?
- S10x standards

http://www.nauticalcharts.noaa.gov/mcd/enc/

"Download NOAA ENC's" - Registered trade mark - hmmm.

http://www.nauticalcharts.noaa.gov/mcd/enc/download\_agreement.htm

"Permitted Use": This is US Government data, so we can use it for
what ever we want, but if you are navigating with this data you are
stuck with all kinds of archaic rules. Sorry. But for the class,
it's use and abuse!

### Electronic Navigational Charts: NOAA ENC®

NOAA Electronic Navigational Charts® (NOAA ENC®) are vector data sets that represent NOAA's newest and most powerful electronic charting product. NOAA ENC® conform with the International Hydrographic Office (IHO) S-57 international exchange format, comply with the IHO ENC Product Specification, and are provided with incremental updates that supply Notice to Mariners corrections and other critical changes. NOAA ENC® and updates are available for free download. NOAA ENC data may be used to fuel Electronic Chart and Display Information Systems (ECDIS).

| Obtain   | Resources  |

The Chart Downloader Web Site provides the public with access to, and information about, NOAA navigation products.

Click [Here](#) to Download NOAA Raster Navigational Charts.

NOAA Raster Navigational Charts are available in BSB format. NOAA RNCs are geo-referenced, digital images of NOAA navigational charts. NOAA RNCs are updated weekly with Notice to Mariner corrections. NOAA RNCs are designed to be used with Raster Chart Display Systems. Click [here](#) for free demo software. RNCs are not meant to be printed.

Click [Here](#) to Download NOAA Electronic Navigational Charts

NOAA Electronic Navigational Charts are available in S-57 format. NOAA ENC's are vector files of chart features. NOAA ENC's are updated weekly with Notice to Mariner Corrections. NOAA ENC's support marine navigation by providing the official Electronic Navigational Chart used in ECDIS and in electronic charting systems. Click [here](#) for free demo software.

Click [Here](#) to use the Graphical Catalog.

information on ENC Distributorships.

Copying of the NOAA ENC's to any other server or location for further distribution is discouraged unless the following guidelines are followed: 1) this User Agreement is displayed and accepted by anyone accessing the NOAA ENC's, and 2) a reference to this Web site is included so that anyone accessing the NOAA ENC's is advised of their origin.

If these NOAA ENC's are incorporated into any other product in a form other than as provided by NOAA, the producer of that product assumes full liability and must adhere to conditions described in the paragraph above concerning copying.

#### 4. Warnings

Weekly updates to the ENC's are done on a "best efforts" basis. The timing of their availability is not guaranteed. You are responsible for ensuring that your ENC's are the most current edition and that the most recent updates have been applied.

While NOAA has accuracy standards for each step in the data collection and chart production process, much of the depth information found on NOAA charts is based on surveys conducted before 1940, the shoreline is more than 20 years old, and paper charts used to be compiled manually. For more information regarding the accuracy of electronic charts, click <http://chartmaker.ncd.noaa.gov/mcd/enc/encartcl.htm>.

#### 5. Trademarks and Copyright

"NOAA" and the NOAA emblem are registered trademarks of the National Oceanic and Atmospheric Administration.

NOAA ENC is a registered trademark of the National Oceanic and Atmospheric Administration.

sis. The timing of their  
availability is not guaranteed. You are responsible for ensuring that your ENCs are  
the most current edition and that the most recent updates have been applied.

While NOAA has accuracy standards for each step in the data collection and chart  
production process, much of the depth information found on NOAA charts is based  
on surveys conducted before 1940, the shoreline is more than 20 years old, and  
paper charts used to be compiled manually. For more information regarding the  
accuracy of electronic charts, click <http://chartmaker.ncd.noaa.gov/mcd/enc/encartcl.htm>.

File Edit View Search Terminal Help

```
-p extract files to pipe, no messages
-f freshen existing files, create none
-u update files, create if necessary
-v list verbosely/show version info
-x exclude files that follow (in xlist)
-l list files (short format)
-t test compressed archive data
-z display archive comment only
-T timestamp archive to latest
-d extract files into exdir
```

modifiers:

```
-n never overwrite existing files
-o overwrite files WITHOUT prompting
-j junk paths (do not make directories)
-U use escapes for all non-ASCII Unicode
-C match filenames case-insensitively
-X restore UID/GID info
-K keep setuid/setgid/tacky permissions
-O CHARSET specify a character encoding for DOS, Windows and OS/2 archives
-I CHARSET specify a character encoding for UNIX and other archives
-q quiet mode (-qq => quieter)
-a auto-convert any text files
-aa treat ALL files as text
-UU ignore any Unicode fields
-L make (some) names lowercase
-V retain VMS version numbers
-M pipe through "more" pager
```

See "unzip -hh" or unzip.txt for more help. Examples:

unzip data1 -x joe =&gt; extract all files except joe from zipfile data1.zip

unzip -p foo | more =&gt; send contents of foo.zip via pipe into program more

unzip -fo foo ReadMe =&gt; quietly replace existing ReadMe if archive file newer

ogrinfo(1) ogrinfo(1)

**NAME**

ogrinfo - .TH "ogrinfo" 1 "Wed Aug 24 2011" "GDAL"

**NAME**

ogrinfo - lists information about an OGR supported data source

**SYNOPSIS**

```
ogrinfo [-ro] [-q] [-where restricted_where]
        [-spat xmin ymin xmax ymax] [-fid fid]
        [-sql statement] [-al] [-so] [--formats]
        datasource_name [layer [layer ...]]
```

**DESCRIPTION**

The ogrinfo program lists various information about an OGR supported data source to stdout (the terminal).

**-ro:**  
Open the data source in read-only mode.

**-al:**  
List all features of all layers (used instead of having to give layer names as arguments).

**-so:**  
Summary Only: suppress listing of features, show only the summary information like projection, schema, feature count and extents.

Manual page ogrinfo(1) line 1

File Edit View Search Terminal Help

```

-append: Append to existing layer instead of creating new if it exists
-overwrite: delete the output layer and recreate it empty
-update: Open existing output datasource in update mode
-select field_list: Comma-delimited list of fields from input layer to
                    copy to the new layer (defaults to all)
-where restricted_where: Attribute query (like SQL WHERE)
-sql statement: Execute given SQL statement and save result.
-skipfailures: skip features or layers that fail to convert
-gt n: group n features per transaction (default 200)
-spat xmin ymin xmax ymax: spatial query extents
-segmentize max_dist: maximum distance between 2 nodes.
                       Used to create intermediate points
-dsco NAME=VALUE: Dataset creation option (format specific)
-lco NAME=VALUE: Layer creation option (format specific)
-nln name: Assign an alternate name to the new layer
-nlt type: Force a geometry type for new layer. One of NONE, GEOMETRY,
          POINT, LINESTRING, POLYGON, GEOMETRYCOLLECTION, MULTIPOINT,
          MULTIPOLYGON, or MULTILINESTRING. Add "25D" for 3D layers.
          Default is type of source layer.
-a_srs srs_def: Assign an output SRS
-t_srs srs_def: Reproject/transform to this SRS on output
-s_srs srs_def: Override source SRS

```

Srs\_def can be a full WKT definition (hard to escape properly),  
or a well known definition (ie. EPSG:4326) or a file with a WKT  
definition.

-lco NAME=VALUE: Layer creation option (format specific)  
-nln name: Assign an alternate name to the new layer  
-nlt type: Force a geometry type for new layer. One of NONE, GEOMETRY, POINT, LINESTRING, POLYGON, GEOMETRYCOLLECTION, MULTIPOINT, MULTIPOLYGON, or MULTILINESTRING. Add "25D" for 3D layers. Default is type of source layer.  
-a\_srs srs\_def: Assign an output SRS  
-t\_srs srs\_def: Reproject/transform to this SRS on output  
-s\_srs srs\_def: Override source SRS

Srs\_def can be a full WKT definition (hard to escape properly), or a well known definition (ie. EPSG:4326) or a file with a WKT definition.

## Select OGR layers to load

## Sub layers list

This is the list of all layers available in the datasource of the active layer. You can select the layers to load. The layers will be loaded when you press "OK".

The layer name is format dependent. Consult the OGR documentation or the documentation of your data format to determine the nature of the included information.

**Be advised:** selecting an already opened layer will not generate an error message and the layer will end up loaded twice!

| Layer ID | Layer name | Nb of feature | Geometry type |
|----------|------------|---------------|---------------|
| 12       | DAYMAR     | 1             | Point         |
| 13       | DEPARE     | 295           | Unknown       |
| 14       | DEPCNT     | 507           | LineString    |
| 15       | DRGARE     | 5             | Polygon       |

Most Visited Getting Started Latest Headlines

There are several options for downloading:

1. Select a zip file of an [Individual RNC](#).
2. Select up to twenty [Specific RNCs](#) that will be dynamically zipped and made available for download.
3. Write an application or script that uses the data in the [RNC Product Catalog](#), an XML file that contains the status of the RNCs available for download.
4. Select one of the pre-packaged zip files below:

## All RNCs:

| Name                | XML                  | Size    | Zip File Date Time* |
|---------------------|----------------------|---------|---------------------|
| <a href="#">All</a> | <a href="#">View</a> | 2017 MB | 10/20/2011 17:01:24 |

RNCs by Coast Guard Districts ([map](#)):
